SUZHOU GUDWAY CNC EQUIPMENT CO.,LTD

GFM900 SERIES

T type bed structure

- The highest rigidity, the highest processing superior performance. The bed base adopts integral casting process, and the overall rigidity is greatly improved
- Heidenhain five-axis closed-loop measurement system. Guarantee of high precision of machine.

- High-rigidity bed base with three-point support. No special requirements for foundation. The bed is not easy to distort, with high accuracy.
- German INA/ Swiss SCHNEEBERGER linear guide, widened slider, more durable accuracy

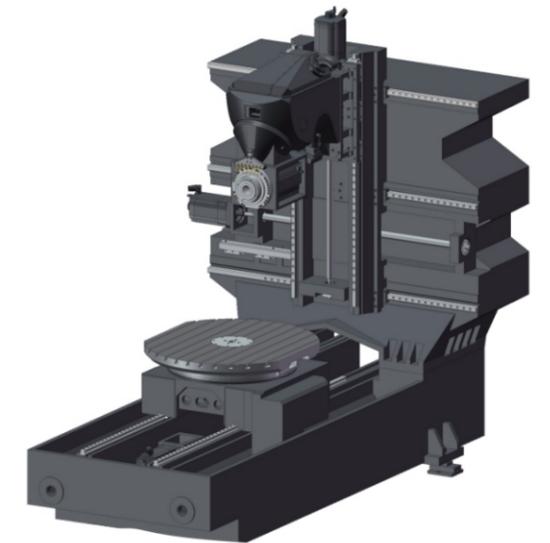

GFM1300/1600 SERIES

Wall back bed structure

- Higher rigidity
More speed
Smaller overturning moment
- Heidenhain five-axis closed-loop measurement system
Guarantee of high precision of machine
- High-rigidity bed base with three-point support
No fuss about the foundation
Excellent stability is demonstrated in all situations

- SHUTON elongated double nut structure screw effectively improves the preload, greatly improves the positioning accuracy and cutting performance
- German INA linear guide rail, widened slider, more durable accuracy
- Siemens 1FT series high dynamic response motor

GFM2100/2300 SERIES

Gantry moving beam bed structure

Adopt 45 degree oblique five-axis head structure, closed-loop system. Rigid enough, good positioning accuracy /X\Y axis stroke 2300mm, suitable for processing aviation casings and other products/The turntable can be moved into the dragon door frame, making the machine cantilever smaller. The screw is fixed and the nut is rotated, so that the machine tool is large and not bulky, and the real high-performance five-axis machine tool is realized.

- Using the grating ruler full closed-loop control

- Hollow cold screw, take away the heat generated by the movement, the accuracy is guaranteed

- Choose water-cooled 1FT series high-performance motor, with high dynamic response and motion control accuracy

- All guide rails are used constant temperature cooling system, reduce heat deformation, further improve the accuracy

- Bed 3-point support, not affected by foundation distortion, good accuracy retention

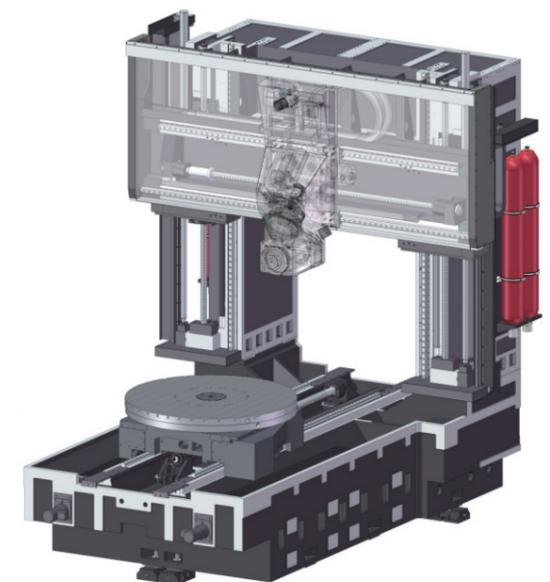

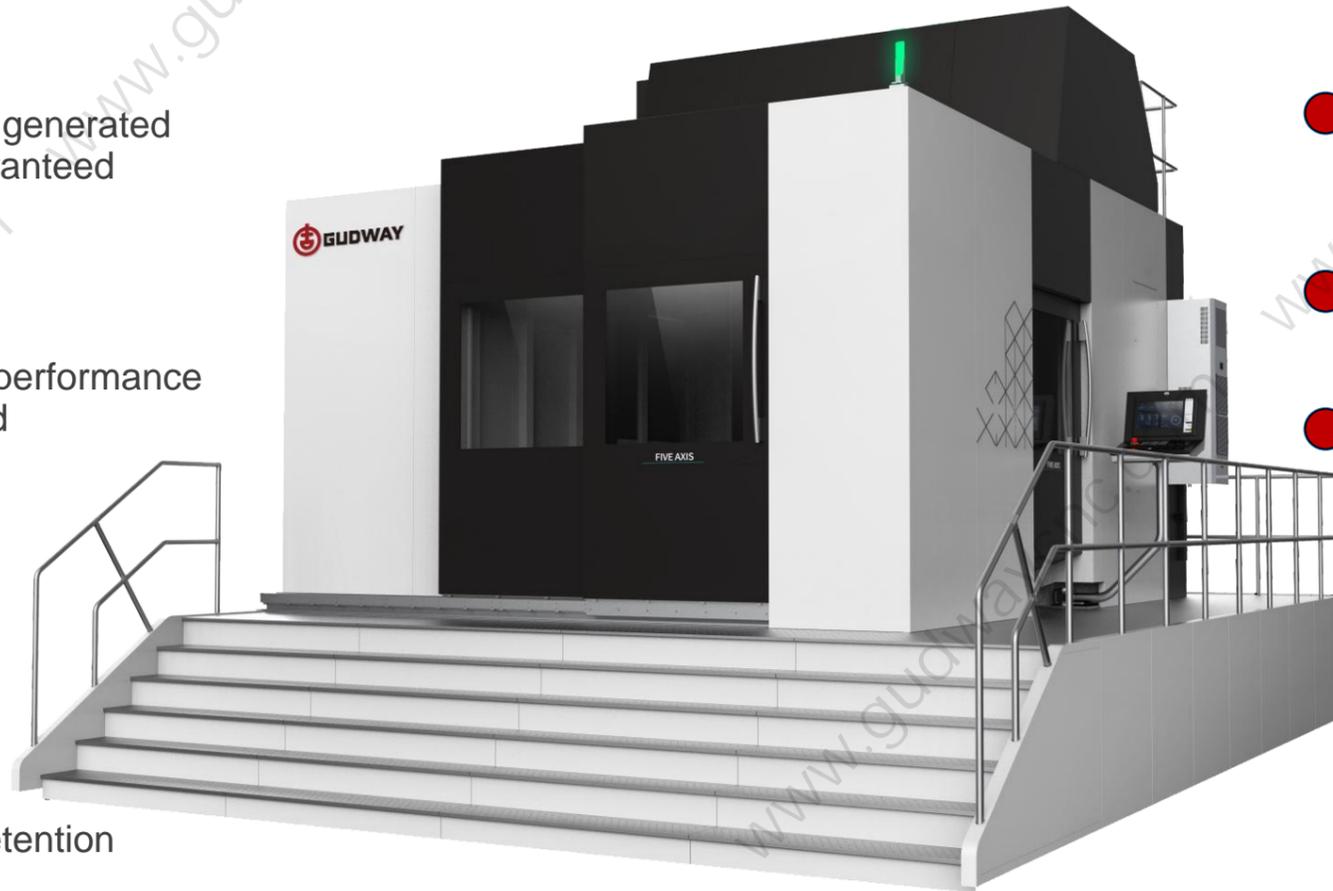

- Base cast with integral cross reinforcement, better rigidity

- Double balance cylinder, a total of 4 large capacity balance accumulators, beam movement is smooth, high control accuracy

- Linear shaft screw drive, screw fixed not rotating, motor drive lock, can achieve high dynamic response

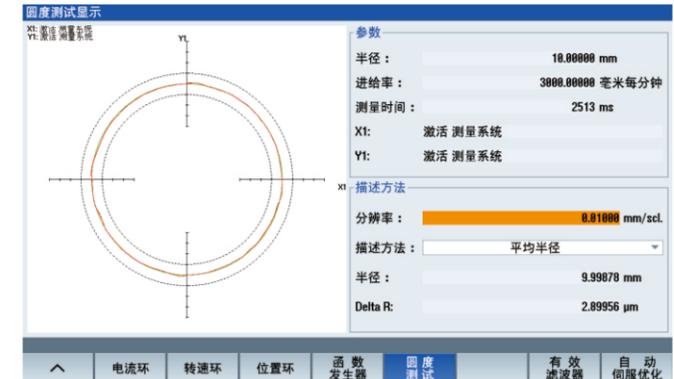

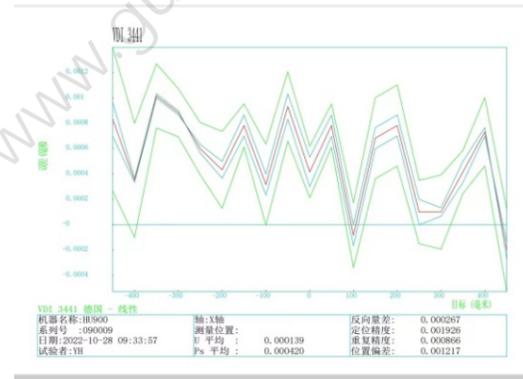

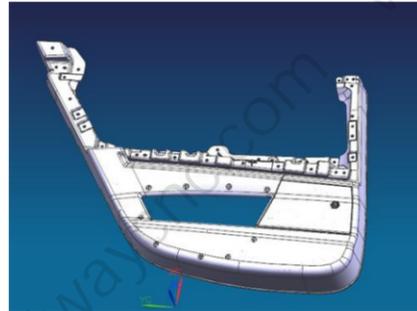

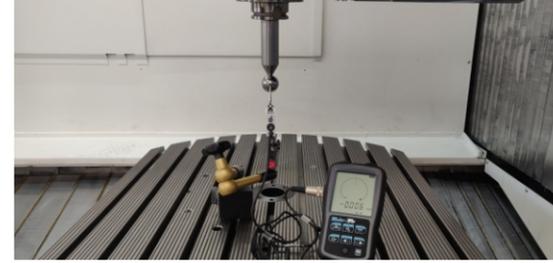

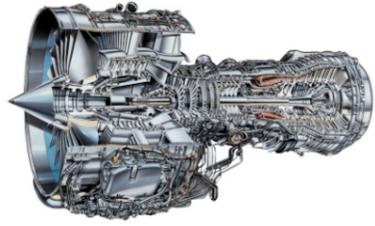

- 55mm high precision guide rail imported from Switzerland

- YRT turntable bearing + thrust bearing, turntable bearing ability is excellent

Our machines serve various machining industries such as military defense, aerospace, energy and power

Production assembly debugging

Linear axis

Optional

- High power spindle
- Work probe
- Knife setting instrument in machine
- Spindle center water
- Remote diagnostic services
- A turnkey project
- Adaptive cutting function
- Vibration monitoring
- FMS system.
